

## CS232 Tree Postorder Traversal 02 - Fill In Handout

Given the following binary tree and PostOrder algorithm determine the traversal order

```
Postorder(binTree:BinaryTree): void
  If(binTree is not empty)
    Postorder(left subtree of binTree's root)
    Postorder(right subtree of binTree's root)
    Visit the root of binTree
```
